URL whitelisting

The following URLs should be whitelisted:

- <https://mtdapi.cloud.taxsystems.com>
- <https://alphabridgeapi.cloud.taxsystems.com>

Proxy

If you have a proxy enabled, the AlphaBridge Excel file is not aware of this. There are different methods that can be used to resolve this issue; however, the popular option is to add **netsh winhttp set proxy proxyserver:port** into the PC config using the command line.

Azure IP addresses

We host our software on Microsoft Azure in the three regions: UK South 2, UK South and UK West. Below is a list of the IP addresses for each region. More information can be found here:
